Fri 18 th	HAUC Unit visit		Dissertation progress Planning & update		Final review & feedback		

Lecturing contributors are free to divide their sessions between lecturing, questions, discussion and case studies, as they may wish. Such case studies can be very informative!

Pharmacists studying Modules 3 and 4 for the diploma, will be expected, as important preliminary preparation, to have at least read the relevant chapters in the 'Veterinary Pharmacy' textbook published in Spring 2004 by the Pharmaceutical Press.

*Unit visits (starred), include some 'hands-on' experience opportunities – splendid and rather special!
